CRUSHER BUCKET

The "BM" series crusher bucket is designed for use on machines from 20-25 tonnes. The BM25 bucket has a 650mm x 460mm opening and the rear aperture is adjustable between 50-100mm to suit each individual application. Replaceable jaw plates are bolted into the lower and rear jaws to allow simple maintenance and minimise downtime. Output of 40-60 tonnes per hour can be achieved depending upon material type. The BM series is operated from a standard hammer circuit and can easily be interchanged between machines due to it's bolt-on style mounting brackets.

MODEL		BM25
Machine Weight	[tonne]	20:30
Weight	[kg]	2500
Opening Width	[mm]	650
Opening Height	[mm]	460
Aperture	[mm]	50-100
Capacity	[M ³]	0.6
Flow	[l/min]	180
Pressure	[bar]	220

Specifications subject to modification at manufacturers discretion. All weights/sizes approximate. E&OE
