PM Series - Rotary Scrap Grab

northerntrack

ROTARY SCRAP GRAB

A versatile tool for the re-handling and loading of scrap and wood. Widely used in the scrap industry for materials re-handling. Equipped with full 360 hydraulic rotation for accurate positioning and operation. Fully enclosed cylinders to avoid damage whilst in operation the PM series is a useful and cost-effective solution for bulk handling duties. Equipped with replaceable teeth on the tynes, three models are available to suit 15 to 40 tonne excavators.

MODEL		PM15	PM20	PM30
Machine Weight	[tonne]	15:20	20:30	30:40
Weight	[kg]	1250	1850	3200
Opening (A)	[mm]	1570	1750	2180
Height (B)	[mm]	2020	2200	2800
Width (C)	[mm]	710	810	980
Depth (D)	[mm]	800	850	1100
Operating Pressure	[bar]	310	310	310
Flow	[l/min]	100/200	180/250	200/300
Rotation Pressure	[bar]	140	140	140
Flow (max)	[l/min]	10	10	10
Capacity	[m3]	0.6	0.9	1.2
